

As a local listener to Air1 My life has been dramaticly changed by the emotional support and encouragment I have recived from them. 1 1/2 years ago I lost my mother, 1 child and almost lost 2 others and a close friend. All in one fell swoop. I don't think I would have survied if it wasn't for AIR1's support. AIR1 has not only touched my life but the many, many Air1 listeners that I encounter every day. As A former employee of our local mental health agency, I witnessed first hand how Air1 positivley affected the lives of the mentally ill. There was a little joke that if we could use Air1 as the main form of therepy for our patients, we could wipe out mental illness all together. As you can see AIR1 is a greatly needed service in my area. Our community would certantly be lost without it. I know I would. Call me crazy but I truley belive that the suicied rate would dramaticly increase with out AIR1. I appricate your time and thankyou for reading this.
